This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of the claims:

Claim 1 (currently amended): A patch preparation comprising a support and an adhesive base, the adhesive base containing 8 to 50 mass % relative to total amount of the adhesive base of a rubber-system macromolecule having a double bond at least in a principal chain thereof and 0.1 to 10 mass % relative to entire amount of the preparation of a nonsteroidal anti-inflammatory analgesic drug and a combination of a hydrogenated rosin ester and a terpene resin as a tackifier for 10 to 20 mass % in total relative to total amount of the adhesive base, and the adhesive base further containing 0.5 to 20 mass % relative to entire amount of the preparation of a UVA blocker and/or a UVB blocker as a stabilizer for the rubber-system macromolecule.

Claim 2 (previously presented): The patch preparation according to claim 1, wherein the rubber-system macromolecule having a double bond at least in a principal chain thereof is selected from the group consisting of a styrene-isoprene-styrene block copolymer, a styrene-butadiene-styrene block copolymer, a styrene-butadiene copolymer, polyisoprene, and polybutadiene.

Claim 3 (previously presented): The patch preparation according to claim 1, wherein the nonsteroidal anti-inflammatory analgesic drug is selected from the group consisting of ketoprofen, tiaprofenic acid, suprofen,

tolmetin, carprofen, benoxaprofen, piroxicam, meloxicam, benzydamine, naproxen, felbinac, diclofenac, ibuprofen, diflunisal, azapropazone, etodolac, valdecoxib, celecoxib, rofecoxib, and pharmaceutically acceptable salts thereof.

Claim 4 (previously presented): The patch preparation according to claim 1, wherein the UVA blocker is selected from the group consisting of a dibenzoylmethane derivative and a benzotriazole derivative.

Claim 5 (previously presented): The patch preparation according to claim 4, wherein the UVA blocker is selected from the group consisting of 4-tert-butyl-4'-methoxydibenzoylmethane, 2-(2H-benzotriazol-2-yl)-4-methyl-6-[2-methyl-3-[1,3,3,3-tetramethyl-1-(trimethylsilyl)oxy]disiloxanyl]propyl]phenol, and 2-(2-hydroxy-5-methoxyphenyl)-benzotriazole.

Claim 6 (previously presented): The patch preparation according to claim 1, wherein the UVB blocker is selected from the group consisting of a benzophenone derivative, a cinnamic acid derivative, a camphor derivative, an amino acid-based compound, and a benzoylpinacolone derivative.

Claim 7 (previously presented): The patch preparation according to claim 1, wherein it contains 2 to 10 mass % relative to entire amount of the preparation of the UVA blocker and/or the UVB blocker in the adhesive base.

Claims 8-10 (canceled)
